

Neck Support Pillows

It supports fully your neck through special design. Offering an ergonomic support for neck and shoulder muscles, it helps relieve possible pain causes and get you a good night rest. It helps also you keep your spine aligned during sleep. It is recommended especially for those who have neck pain, cervical discal hernia and neck flattening.

When you sleep on stomach, side and back, it fills all gaps between neck and the surface, and allows you to wake up feeling refreshed and pain-free.
