

## Classic Gel Pillows

Fully supports both neck and head by adapting itself to the sleeper's position and pressure points. It is ideal for those who can't sleep with special design pillows but want to feel memory foam comfort. A gel layer on the surface prevents night sweats and provides refreshing coolness.

## Special Shape Pillows

PM-VAS1

Helps reduce snoring by adjusting correct Sleep Posture. Helps reduce shoulder and neck pains.

PM-SAP1

Designed for patients using respirators. Reduce mask interference and help prevent your mask from shifting and moving throughout the night, allowing you to sleep in comfort with any type of mask.

PM-VBK1

It has a special design that allows you to breathe more easily when you sleep. The shape, material and cover of the pillow are specially designed for better ventilation, comfort and a more restful sleep.
